⊙ github.com/BinarySenseiii in linkedin.com/in/faisal-tariq1

Experienced developer with over **5** years of specialized expertise in React, TypeScript, and Node.js. Proven track record of delivering high-quality results in team settings. Highly skilled in transforming creative design concepts into robust, pixel-perfect web applications.

EDUCATION

Bachelors in Computer Science (BSC), *Comsats university*	2017
Bootcamp Web Development, *Cisco Networking Academy*	2018
Typescript Bootcamp (2 months duration), *TotalTypescript.com*	2022

EXPERIENCE

React/Web3 Developer, *CollosalBit*   Mar 2022 – May 2024 │ Dubai, Onsite

CollosalBit is a leading NFT and Metaverse consultancy company, known for pioneering achievements such as securing the winning bid of **$56,000** for the world's first augmented reality NFT mural. You can read more about it *here* ⧉ ..

- Delivered new features with high-quality code under tight deadlines, consistently meeting project milestones.
- Developed cutting-edge 3D components using Three.js and WebGL, highly interactive and immersive user experiences
- Optimized app performance by streamlining API calls with a caching system, achieving a 15% reduction in load times
- Enhanced website accessibility, improving user experience for individuals with disabilities and expanding reach.
- Improved client-side script efficiency by 25% with advanced debugging tools, resulting in faster applications
- Rewrote HTML to meet industry and company standards for SEO and Accessibility. This drove a 600% increase in users by appearing on the first page of Google search results

Frontend Developer, *Al-muqsit cyber solutions*   Jan 2020 – Oct 2022 │ Pakistan, Remote

- Developed 6 interactive front-end applications using the React and Typescript, enhancing consumer experience by 40%
- Pioneered a mobile-first approach, resulting in a 25% increase in user engagement on mobile devices.
- Utilized Redux for state management, reducing code complexity and increasing team productivity.
- Tested, debugged, and shipped 10s of 1000s of lines of code to multiple teams. This lead to 100% bug-free deployment.

PROJECTS

Luma, *Next.js │ React Native │ Stripe │ GSAP │ CSS-in-JS solution │ APIs*   2023 – present

- User authentication integrated with JWT tokens and cookies for enhanced security and precise user access control
- Established a robust payment system supporting multiple options to facilitate secure transactions
- Integrated Sentry Real-time error tracking for proactive issue resolution, ensuring a seamless user experience.
- Utilized React code-splitting to optimize performance by reducing client-side script load, for complex components

Live URL: https://lu.ma/home ⧉

ChainGPT, *Next.js │ Web3 │ Ethers.js │ Chakra-UI │ React Query │ Recharts*   Apr 2023 – Dec 2023

- Implemented smart contracts for secure NFT minting, trading, and ownership transfer
- Utilized secure MetaMask integration for seamless wallet interactions across various blockchain networks,
- Implemented automated testing suite to ensure smart contract reliability and platform stability
- Designed scalable microservices with Docker/Kubernetes for efficient distributed deployment.

Live URL: https://app.chaingpt.org/ ⧉

Mint Kuto, *Next.js │ Typescript │ Artificial intelligence │ Web3*   2013

- integrated Web3 functionalities using Ethereum smart contracts to enable seamless minting, trading, and ownership management of AI-generated NFTs
- Implemented IPFS for decentralized storage of AI-generated and human-authored content, ensuring data integrity.
- Collaborated with backend developers to integrate GraphQL APIs for efficient data fetching and real-time updates
